

PolyNucleotide

# MIFILL PDNA HYDRO

Bring back moisture

And brightens your skin!

HA

## HYALURONIC ACID & CROSS-LINKED HYALURONIC ACID

**Hyaluronic Acid (HA)** is a glycosaminoglycan, a vital unique capacity to bind and retain moisture. HA can hold up to 1,000 times its molecular weight in water, maintains and provides **hydration and moisture** to the skin.

The natural aging process and harmful exposure such as UV, pollution, oxidation, etc. will decrease its amount in the skin

## PDNA from SALMON DNA

PolyNucleotide (PDNA) extracted from Salmon Sperm, has been known widely as an advanced solution for skin damage repairment and restructuring.

Salmon DNA has proven to be the most compatible with humans, and it is extracted from Salmon sperm specifically because it has the highest purity level.

PDNA has strong wound healing properties, it supports blood vessel growth, and it stimulates skin to produce more HA and collagen, thus gain hydration and elasticity.

## MANNITOL

Mannitol is a type of sugar-alcohol that is used in various medical purposes for treatment of diseases & illness.

*Dramatically increase the level of skin hydration*

*Skin booster for elasticity & rejuvenation*

*Regain a youthful radiant appearance*
